TABLE OF CONTENTS

NUMBER 1, JANUARY 1978

Sinclair, G D & Brasch, K, The reversible action of α-amanitin on nuclear structure and molecular composition 1

von Figura, K, Secretion of β-hexosaminidase by cultured human skin fibroblasts. Kinetics, effect of temperature, cell density, serum concentration and pH 15

Geremia, R, d'Agostino, A & Monesi, V, Biochemical evidence of haploid gene activity in spermatogenesis of the mouse 23

Rosset, R, Effect of ecdysone on a *Drosophila* cell line 31

Warr, J R, Flanagan, D & Quinn, D, Mutants of *Chlamydomonas reinhardii* with altered sensitivity to antimicrotubular agents 37

Thompson, J E, Gruber, M Y & Kruuv, J, Changes in glycosidase enzyme activity during growth of normal and transformed cells 47

Okuda, A & Kimura, G, Serum stimulation of DNA synthesis in rat 3Y1 cells. Dependence on cell density, serum concentration, and ratio of cell number to medium volume 55

Sakakibara, K, Takaoka, T, Katsuta, H, Umeda, M & Tsukada, Y, Collagen fiber formations as a common property of epithelial liver cell lines in culture 63

Lindahl, P E, Effects of some steroid hormones on head-to-head association in bovine spermatozoa 73

Korf, B R & Diacumakos E G, Microsurgically-extracted metaphase chromosomes of the Indian muntjac examined with phase contrast and scanning electron microscopy 83

Cheung, H T, Cantarow, W D & Sundharadas, G, Colchicine and cytochalasin B (CB) effects on random movement, spreading and adhesion of mouse macrophages 95

Szubinska, B, Closure of the plasma membrane around microneedle in *Amoeba proteus*. An ultrastructural study 105

Epstein, C J & Smith, S A, Handling of actinomycin D by preimplantation mouse embryos 117

Kurkinen, M, Wartiovaara, J & Vaheri, A, Cytochalasin B releases a major surface-associated glycoprotein, fibronectin, from cultured fibroblasts 127

Langford, G M, In vitro assembly of dogfish brain tubulin and the induction of coiled ribbon polymers by calcium 139

Daskal, Y, Ballal, N R & Busch, H, Ultrastructural and biochemical studies on the isolation of nucleolar chromatin from Novikoff hepatoma cell nucleoli 153

Mattern, M R & Painter, R B, A possible difference in the mechanism of replication of moderately repeated nucleotide sequences in Chinese hamster ovary cells 167

Hauser, H, Knippers R & Schäfer, K P, Increased rate of RNA-polyadenylation. An early response in concanavalin A activated lymphocytes 175

Rudloff, E, Acetylcholine receptors in the central nervous system of *Drosophila melanogaster* 185

Allan, R B & Wilkinson, P C, A visual analysis of chemotactic and chemokinetic locomotion of human neutrophil leucocytes. Use of a new chemotaxis assay with *Candida albicans* as gradient source 191

Bresch, H, Mitochondrial profile densities and areas in different developmental stages of the sea urchin *Sphaerechinus granularis* 205

Andina, R J, A study of X chromosome regulation during oogenesis in the mouse 211

Gordon, M Y & Douglas, I D C, Human bone marrow colony formation in diffusion chambers. Normal values 219

NUMBER 2, FEBRUARY 1978

Innis, M A & Craig, S P, Mitochondrial regulation in sea urchins. II. Formation of polyribosomes within the mitochondria of 4–8 cell stage embryos of the sea urchin 223

Melvin, M A L & Keir, H M, Polyamine metabolism in BHK21/C13 cells. Loss of spermidine from cells following transfer to serum-depleted medium 231

Holland, M J C, Klein, N C & Cox, R P, Experimental modulation of PRPP availability for ribonucleotide synthesis from hypoxanthine in human skin fibroblast cultures 237

Splinter, T A W, Beudeker, M & Van Beek, A, Changes in cell density induced by Isopaque 245

Rikmenspoel, R, Orris, S E & O'Day, P M, Ionic requirements of impaled bull spermatozoa driven by external ADP and ATP 253

Honma, Y, Kasukabe, T & Hozumi, M, Production of differentiation-stimulating factor in cultured mouse myeloid leukemia cells treated by glucocorticoids 261

Lau, A F, Ruddon, R W, Collett, M S & Faras, A J, Distribution of the globin gene in active and inactive chromatin fractions from Friend erythroleukemia cells 269

Neumann, J R, Housman, D & Ingram, V M, Nuclear protein synthesis and phosphorylation in Friend erythroleukemia cells stimulated with DMSO 277

Shier, W T & Trotter, J T, Oncogenic transformation of 3T3 cells is associated with conversion from an adult to an 'embryonic' esterase isoenzyme pattern 285

Westermark, B, Growth control in miniclones of human glial cells 295
Becerra, J & López-Sáez, J F, Effects of caffeine, calcium and magnesium on plant cytokinesis 301
Lernhardt, W, Andersson, J, Coutinho, A & Melchers, F, Cloning of murine transformed cell lines in suspension culture with efficiencies near 100% 309
Moore, G P M, RNA synthesis in fixed cells by endogenous RNA polymerases 317
Schweizer, D, Ambros, P & Andrle, M, Modification of DAPI banding on human chromosomes by prestaining with a DNA-binding oligopeptide antibiotic, distamycin A 327
Brumbaugh, J, Wilkins, L & Schall, D, Intergenic complementation in chick melanocyte heterokaryons 333
Matthews, H R & Bradbury, E M, The role of H1 histone phosphorylation in the cell cycle. Turbidity studies of H1-DNA interaction 343
Hauser, P & Vaes, G, The isolation and cultivation of rabbit bone marrow mononuclear phagocytes 353
Ghosh, S, Paweletz, N & Ghosh, I, Cytological identification and characterization of the nuclear matrix 363
Gurley, L R, Walters, R A, Barham, S S & Deaven, L L, Heterochromatin and histone phosphorylation 373
Speckart, S F, Boldt, D H & Ryerson, K L, Cell surface changes in transformed human lymphocytes. I. ConA and E-PHA induced unique changes in surface topography 385
Wilson, M J & Poirier, L A, An increased requirement for methionine by transformed rat liver epithelial cells in vitro 397
Bertheussen, K & Seljelid, R, Echinoid phagocytes in vitro 401
Sasaki, M & Keenan, T W, Membranes of mammary gland. XV. 5-Thio-D-glucose decreases lactose content and inhibits secretory vesicle maturation in lactating rat mammary gland 413
Flickinger, C J, Interactions between endoplasmic reticulum and nuclear membranes of different types of cells during repair of damaged amoeba nuclei 427
Rikihisa, Y & Mizuno, D, Different arrangements of phagolysosome membranes which depend upon the particles phagocytized. Observation with markers of the two sides of plasma membranes 437

PRELIMINARY NOTES

Wright, W E & Gros, F, A general method for heterokaryon identification using a BUdR/Hoechst technique 451
Margolis, L B, Dyatlovitskaya, E V & Bergelson, L D, Cell-lipid interactions. Cell attachment to lipid substrates 454
Huang, C C & Furukawa, M, Sister chromatid exchanges in human lymphoid cell lines cultured in diffusion chambers in mice. A host-mediated assay system for mutagenicity 458
Heby, O, Andersson, G & Gray, J W, Interference with S and G2 phase progression by polyamine synthesis inhibitors 461
Majeska, R J, Rodan, S B & Rodan, G A, Maintenance of parathyroid hormone response in clonal rat osteosarcoma lines 465
Fujishima, M & Hiwatshi, K, Transplantation of germ nucleus in *Paramecium caudatum*. I. Nuclei in the pre-meiotic S phase can enter into mitotic cycle 468
Daskal, Y, Mace, M & Busch, H, Demonstration of membranous patches on isolated chromosomes 472
Dunn, G A & Ebendal, T, Contact guidance on oriented collagen gels 475
Meier, P J, Spycher, M A & Meyer, U A, Isolation of a subfraction of rough endoplasmic reticulum closely associated with mitochondria. Evidence for its role in cytochrome P450 synthesis 479
Moriwaki, K & Imai, H T, Mechanism of ploidy shift from diploidy to tetraploidy in MSPC-1 mouse myeloma 483
Burkholder, G D, Reciprocal Giemsa staining of late DNA replicating regions produced by low and high pH sodium phosphate 489
Sparkes, R S, Mohandas, T, Sparkes, M C & Shulkin, J D, Regional localization of human phosphoglucomutase-2 locus on chromosome 4 492
